Đa thừa với interface trong Java

interface A {

void

Bài 1:

```
interface Mail {
    void SendMail();
    void log();
}

class Mail implements Mail {
    @Override
    public void SendMail() {
        System.out.println("Đang gửi mail...");
    }

    @Override
    public void log() {
        System.out.println("Đang ghi Log ...");
    }

~~public~~ class Main {
    public static void main(String[] args)
{
```

```
        MailImpl mail = new MailImpl();
        mail.sendMail();
        mail.~~send~~log();
    }
}
```

B2

```
interface Shape {
    double getArea();
    double getPerimeter();
    void draw();
}

class Rectangle implements Shape {
    double width;
    double height;
    Rectangle (double w, double h) {
        width = w;
        height = h;
    }
    Public double getArea() {
        return 2 * (width + height);
    }
```
